Project Northland - Power Lines

We would like to know about how Project Northland is being implemented in different classrooms. It is important to understand which components of the curriculum are used and to what degree. This information will help us understand which components are most doable and which are more difficult to implement. This evaluation is not intended to test the teacher or assess his/her performance, rather it is intended to understand how implementation works and where there may be opportunities for additional support.

Curriculum Observation

This section will guide you through an observation of a random class session. Please be sure to record the session number you are observing at the top of the page and follow along in the curriculum guide to identify the expectations for the class session.
