

# SPF SIG evaluation protocol: *Sticker Shock*

## *Overview*

The goal of this evaluation is to collect information about sticker shock events. By tracking this information, you will be able to see how many stickers or bottle hangers were placed during the events, the number of people who were involved in the events, and whether the events received media coverage.

## *Data collection*

There are two data collection tools for this evaluation: the *Sticker Shock Data Summary Form* and the *Sticker Shock Tracking Sheet*. SPF SIG grantees that are implementing sticker shock should complete the tracking sheet and data summary form.

### **Sticker Shock Tracking Sheet**

- The tracking sheet documents information about each retailer included in the sticker shock events. It also collects the information necessary to complete the data summary form.
- The information for each sticker shock event should be entered into a separate row on the tracking sheet.
- The tracking sheet should be completed by the adult advisor or coordinator attending the event.

### **Sticker Shock Data Summary Form**

- The summary form documents information about completed sticker shock events, including:
  - The total number of retailers involved in sticker shock events
  - The total number of stickers or bottle hangers placed during the sticker shock events
  - A brief description of the type of additional educational materials distributed during the sticker shock events (if applicable), this can include materials like flyers, retailer educational materials, coalition brochures, etc.
  - The total number of youth or young adults involved in the sticker shock events
  - The total number of adult advisors, other than law enforcement, involved in the sticker shock events

- The total number of law enforcement involved in the sticker shock event
- The total number of sticker shock events that had media coverage (please note, if an event had media coverage, remember to enter that information into the *Media and Materials Creation and Distribution Tracking* form)
- The data summary form should be completed by the sticker shock coordinator. A form should be completed for each round of sticker shock events.
- A writable, electronic version of the data summary form is available on evaluATOD. This electronic version of the data summary form is read-only, which means once you have completed the form, you will need to save it as a new document.

### ***Data analysis and reporting***

The summary form will serve as your primary method of analyzing data from the sticker shock events. You can also summarize data from multiple sticker shock events by using a new copy of the summary form with the data compiled across events.

In the second year of Phase II, Wilder will provide more in-depth analysis and reporting for this component. If you would like technical assistance with analysis or reporting before that time, please contact your Wilder consultant.
